

# Title of paper

**First A. Author, Designation, Organization with City & Country, Email**

**Second B. Author, Designation, Organization with City & Country, Email**

**Third C. Author, Designation, Organization with City & Country, Email**

**Abstract** No italics, 10 size font, bold. Abstract should not be more than 200 words (The abstract should not exceed 250 words. It should briefly summarize the essence of the paper and address the following areas without using specific subsection titles.):

**Keywords** —At least Six keywords or phrases in alphabetical order, separated by commas. Provide up to 6 keywords, 9 size, bold, italics

## I. INTRODUCTION

Welcome to International Journal for Research in Engineering Application & Management. The main mission is to publish journals and thesis and devote to research and global dissemination of academic information.

All research articles submitted to International Journal should be original in nature, never previously published in any journal or presented in a conference or undergoing such process across the globe.

## II. PROCEDURES FOR PAPER SUBMISSION

### A. Review Stage

Please check with your editor on whether to submit your manuscript as hard copy or electronically for review. If hard copy, submit photocopies such that only one column appears per page. This will give your referees plenty of room to write comments. Send the number of copies specified by your editor (typically four). If submitted electronically, find out if your editor prefers submissions on disk or as e-mail attachments.

If you want to submit your file with one column electronically, please do the following:

--First, click on the View menu and choose Print Layout.

--Second, place your cursor in the first paragraph. Go to the Format menu, choose Columns, choose one column Layout, and choose "apply to whole document" from the dropdown menu.

--Third, click and drag the right margin bar to just over 4 inches in width.

The graphics will stay in the "second" column, but you can drag them to the first column. Make the graphic wider to push out any text that may try to fill in next to the graphic.

### B. Final Stage

We, JOURNAL warmly invites authors submit your new research papers to JOURNAL, and share the valuable experiences with the scientist and scholars around the world. International Journal publishes original research

papers, review papers, literature reviews, Applied and educational articles in all areas of various application of Engineering & Management.

Original research papers, state-of-the-art reviews, and high quality technical notes are invited for publications. All full paper submissions will also be peer reviewed and evaluated based on originality, technical and/or research content/depth, correctness, relevance to Journal, contributions, and readability. The full paper submissions will be chosen based on technical merit, interest, applicability, and how well they fit a coherent and balanced technical program.

### C. Figures

Format and save your graphic images using a suitable graphics processing program that will allow you to create the images as PostScript (PS), Encapsulated PostScript (EPS), or Tagged Image File Format (TIFF), sizes them, and adjusts the resolution settings. If you created your source files in one of the following you will be able to submit the graphics without converting to a PS, EPS, or TIFF file: Microsoft Word, Microsoft PowerPoint, Microsoft Excel, or Portable Document Format (PDF).

## III. MATH

If you are using *Word*, use either the Microsoft Equation Editor or the *MathType* add-on (<http://www.mathtype.com>) for equations in your paper (Insert | Object | Create New | Microsoft Equation *or* MathType Equation). "Float over text" should *not* be selected.

## IV. UNITS

Use either SI (MKS) or CGS as primary units. (SI units are strongly encouraged.) English units may be used as secondary units (in parentheses). **This applies to papers in data storage.** For example, write "15 Gb/cm<sup>2</sup> (100 Gb/in<sup>2</sup>). An exception is when English units are used as identifiers in trade, such as "3½-in disk drive." Avoid combining SI and CGS units, such as current in amperes and magnetic field in oersteds. This often leads to confusion because equations do not balance dimensionally. If you must use mixed units, clearly state the units for each

quantity in an equation.

The SI unit for magnetic field strength  $H$  is A/m. However, if you wish to use units of T, either refer to magnetic flux density  $B$  or magnetic field strength symbolized as  $\mu_0 H$ . Use the center dot to separate compound units, e.g., “A·m<sup>2</sup>.”

## V. HELPFUL HINTS

### A. Figures and Tables

Font should be **Times New roman** throughout the paper with **single space** with the following varying sizes.

**Main Paper heading:** 20 size, No italics, bold

If Sub Heading : 14 Size, Bold, Italics

**Section heading:** 10 size, No italics, Title case bold, All Uppercase

**Full text:** 10 size, No bold, No underline, No italics (Only for standard pattern use italics, Bold & Underline), Justify, Single Space.

**Table name and figure name:** 8 size, bold.

**Margin:** All margins are 1 on all sides.

**Abstract:** No italics, 9 size font, bold. Abstract should not be more than 200 words.

**Keywords:** Provide up to 6 keywords, 9 size, bold, italics

**References :** 8 Size, Justify, Numbering e.g. 1 to 10.

### B. References

Number citations consecutively in square brackets [1]. The sentence punctuation follows the brackets [2]. Multiple references [2], [3] are each numbered with separate brackets [1]–[3]. When citing a section in a book, please give the relevant page numbers [2]. In sentences, refer simply to the reference number, as in [3]. Do not use “Ref. [3]” or “reference [3]” except at the beginning of a sentence: “Reference [3] shows ... .” Please do not use automatic endnotes in *Word*, rather, type the reference list at the end of the paper using the “References” style.

Number footnotes separately in superscripts (Insert | Footnote).<sup>1</sup> Place the actual footnote at the bottom of the column in which it is cited; do not put footnotes in the reference list (endnotes). Use letters for table footnotes (see Table I).

Please note that the references at the end of this document are in the preferred referencing style. Give all authors’ names; do not use “*et al.*” unless there are six authors or more. Use a space after authors’ initials. Papers that have not been published should be cited as “unpublished” [4]. Papers that have been accepted for publication, but not yet specified for an issue should be cited as “to be published” [5]. Papers that have been submitted for publication should be cited as “submitted for publication” [6]. Please give affiliations and addresses for private communications [7].

Capitalize only the first word in a paper title, except for

proper nouns and element symbols. For papers published in translation journals, please give the English citation first, followed by the original foreign-language citation [8].

## VI. EDITORIAL POLICY

Submission of a manuscript is not required for participation in a conference. Do not submit a reworked version of a paper you have submitted or published elsewhere. Do not publish “preliminary” data or results. The submitting author is responsible for obtaining agreement of all coauthors and any consent required from sponsors before submitting a paper. JOURNAL strongly discourage courtesy authorship. It is the obligation of the authors to cite relevant prior work.

At least two reviews are required for every paper submitted. For conference-related papers, the decision to accept or reject a paper is made by the conference editors and publications committee; the recommendations of the referees are advisory only. Undecipherable English is a valid reason for rejection. Authors of rejected papers may revise and resubmit them to the TRANSACTIONS as regular papers, whereupon they will be reviewed by two new referees.

## VII. PUBLICATION PRINCIPLES

The contents of JOURNAL TRANSACTIONS and JOURNALS are peer-reviewed and archival. The TRANSACTIONS publishes scholarly articles of archival value as well as tutorial expositions and critical reviews of classical subjects and topics of current interest.

Font should be **Times New roman** throughout the paper with **single space** with the following varying sizes.

**Main Paper heading:** 20 size, No italics, bold

If Sub Heading : 14 Size, Bold, Italics

**Section heading:** 10 size, No italics, Title case bold, All Uppercase

**Full text:** 10 size, No bold, No underline, No italics (Only for standard pattern use italics, Bold & Underline), Justify, Single Space.

**Table name and figure name:** 8 size, bold.

**Margin:** All margins are 1 on all sides.

**Abstract:** No italics, 9 size font, bold. Abstract should not be more than 200 words.

**Keywords:** Provide up to 6 keywords, 9 size, bold, italics

**References :** 8 Size, Justify, Numbering e.g. 1 to 10.

Authors should consider the following points:

- 1) Technical papers submitted for publication must advance the state of knowledge and must cite relevant prior work.
- 2) The length of a submitted paper should be commensurate with the importance, or appropriate to the complexity, of the work. For example, an obvious extension of previously published work might not be appropriate for publication or might be adequately

treated in just a few pages.

- 3) Authors must convince both peer reviewers and the editors of the scientific and technical merit of a paper; the standards of proof are higher when extraordinary or unexpected results are reported.
- 4) Because replication is required for scientific progress, papers submitted for publication must provide sufficient information to allow readers to perform similar experiments or calculations and use the reported results. Although not everything need be disclosed, a paper must contain new, useable, and fully described information. For example, a specimen's chemical composition need not be reported if the main purpose of a paper is to introduce a new measurement technique. Authors should expect to be challenged by reviewers if the results are not supported by adequate data and critical details.
- 5) Papers that describe ongoing work or announce the latest technical achievement, which are suitable for presentation at a professional conference, may not be appropriate for publication in a TRANSACTIONS or JOURNAL.

## VIII. CONCLUSION

Please include a brief summary of the possible clinical implications of your work in the conclusion section. Although a conclusion may review the main points of the paper, do not replicate the abstract as the conclusion. Consider elaborating on the translational importance of the work or suggest applications and extensions.

## APPENDIX

Appendixes, if needed, appear before the acknowledgment.

## ACKNOWLEDGMENT

The preferred spelling of the word "acknowledgment" in American English is without an "e" after the "g." Use the singular heading even if you have many acknowledgments.
